COMMERCIAL LAW & INSOLVENCY

Our commercial law and insolvency practice provides creditors, including vendors as well as private and institutional lenders, and borrowers the expertise they need to navigate through the entire restructuring process. We strive to provide creative and cost-effective solutions without formal court proceedings, but also have represented a wide variety of businesses through formal Chapter 11 proceedings where appropriate.

We represent buyers and sellers of businesses in and out of court and in informal proceedings such as assignments for the benefit of creditors. We also represent creditors and borrowers in structuring relationships to minimize use from the outset, and also to resolve various financial problems.
